

LiquiBand® Standard

The cost effective wound closure solution.

✔ BUTYL-CYANOACRYLATE

- ▶ Rapid polymerization for reliable closure even in time critical situations
- ▶ Strong bond for secure closure

✔ PRECISE APPLICATOR TIP

- ▶ Precise and controlled delivery
- ▶ Excellent cosmetic results

LiquiBand® Standard

Removes the need for dressings and acts as a water-resistant barrier so patients can shower without compromising the wound closure.

Key Features

- ▶ LiquiBand® Standard contains sterile n-butyl cyanoacrylate, it is perfectly suited for use in **Emergency Departments** and designed for closure of clean fresh wounds where the edges are easily apposed and not under tension.
- ▶ LiquiBand® Standard has a **precise application tip** ideal for all types of wounds.
- ▶ LiquiBand® Standard seals the wound and **removes the need for dressings**.
- ▶ LiquiBand® Standard acts as a **water resistant barrier**, patients can shower without compromising the wound closure.

Stronger = More Secure¹

100% Pure Butyl Formulation

Derma+Flex® 52.7(N)

LiquiBand® 45% Stronger 76.7(N)

This means LiquiBand® has a strong secure closure with low viscosity ensuring an even, thin layer can be applied. Perfect for wounds to the facial triangle.

- LiquiBand® Standard & Flow Control = 76.7(N)
- Derma+Flex® = 52.7(N)

Tensile Strength (N)

Rapid Set Time²

3x faster

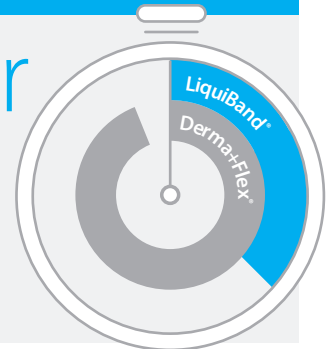

Set time than Derma+Flex®

LiquiBand® has already successfully closed over 5 million wounds.

- LiquiBand® Range = 131(Seconds)
- Derma+Flex® = 338(Seconds)

Average set time in seconds

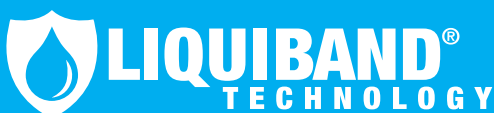

Testing based on lab bench studies

LiquiBand® Standard

Size	Qty Per Box	Product Code	NHS SC Code
